This listing of claims will replace all prior versions, and listings, of claims in the application.

## **Listing of Claims:**

1. (Original) A black toner particle for use in a printing toner, the particle comprising:

a polymer:

carbon black; and

a plurality of different colored pigments;

wherein the carbon black and pigments are dispersed in the polymer.

- 2. (Original) A black toner particle according to claim 1 wherein the plurality of colored pigments comprises two colored pigments.
- 3. (Original) A black toner particle according to claim 1 wherein the plurality of colored pigments comprises three or more colored pigments.
- 4. (Currently amended) A black toner particle according to [[any]]claim

  1 of the preceding claims—wherein one of the colored pigments is a blue pigment.
- 5. (Original) A black toner particle according to claim 4 wherein the blue pigment has a color index pigment blue 15.3.
- 6. (Original) A black toner particle according to claim 4 wherein the blue pigment has a color index pigment blue 15.4.

- 7. (Original) A black toner particle according to claim 6 wherein the blue pigment is a Phtalocyanine pigment.
- 8. (Currently Amended) A black toner particle according to any of the preceding claims claim 1 wherein one of the colored pigments is a violet pigment.
- 9. (Original) A black toner particle according to claim 8 wherein the violet pigment has a color index pigment violet 23.
- 10. (Original)A black toner particle according to claim 8 wherein the violet pigment is a Dioxazine pigment.
- 11. (Currently Amended) A black toner particle according to any of the preceding claims claim 1 wherein the carbon black and different colored pigments provide the toner particle with a Chroma value having magnitude less than about 2, after printing on white paper.
- 12. (Original) A black toner particle, in accordance with claim 11 wherein the carbon black and different colored pigments provide the toner particle with a Chroma value having magnitude less than about 1.5, after printing on white paper.
- 13. (Currently Amended) A black toner particle according to any of the preceding claims claim 1 wherein the carbon black and different colored pigments provide the toner particle with a Chroma value having magnitude less than about 1, after printing on white paper.

LEE & HAYES, PLIC 4 200300550-3

- 14. (Currently Amended) A black toner particle according to any of the preceding claims claim 1 wherein the polymer is a copolymer of ethylene and met acrylic acid.
- 15. (Currently Amended) A black toner particle according to any of the preceding claims claim 1 wherein the carbon black is Nipex 150.
- 16. (Currently Amended) A black liquid toner comprising toner particles in accordance with any of claims 1-15 claim 1 dispersed in a carrier liquid.
- 17. (Original)A liquid toner according to claim 16 and also including a charge director.
- 18. (Currently Amended) A black powder toner comprising toner particles in accordance with any of claims 1-15 claim 1.
- 19. (Currently Amended) A method of printing an image on a substrate comprising:

generating a charge distribution responsive to the image on a surface, the charge distribution defining image areas and background areas;

adhering toner particles comprised in a toner in accordance with any of claims 16-18 claim 16 to image areas on the surface; and

transferring the toner particles from the surface to the substrate.

20. (New) A black toner particle according to claim 4 wherein one of the colored pigments is a violet pigment.

- 21. (New) A black liquid toner comprising toner particles in accordance with claim 20 dispersed in a carrier liquid.
- 22. (New) A method of printing an image on a substrate comprising: generating a charge distribution responsive to the image on a surface, the charge distribution defining image areas and background areas;

adhering toner particles comprised in a toner in accordance with claim 18 to image areas on the surface; and

transferring the toner particles from the surface to the substrate.

23. (New) A black liquid toner comprising toner particles in accordance with claim 3 dispersed in a carrier liquid.
